Art Unit: 1631

### **DETAILED ACTION**

The art unit designated for this application has changed. Applicant(s) are hereby informed that future correspondence should be directed to Art Unit 1631.

#### **Specie Election Requirement for All Claims:**

This application contains claims directed to the following patentably distinct species involving an interfering substance (extracellular hemoglobin product or oxygen-carrying blood substitute, claims 1-8) or exogenous blood substitute (claims 9-23):

Specie A: which is a recombinant human hemoglobin

Specie B: which is a cross-linked hemoglobin

Specie C: which is a polymerized, cross-linked hemoglobin

Specie D: which is a purified bovine hemoglobin

Specie E: which is a hemoglobin coupled to polyethylene glycol

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic to the above species. This distinctness or independence of a recombinant human hemoglobin versus a cross-linked hemoglobin versus a polymerized, cross-linked hemoglobin versus a purified bovine hemoglobin versus a hemoglobin coupled to polyethylene glycol is because they are directed to different entity types regarding the critical limitations of different hemoglobin species. The completely separate entity types of these species are often separately characterized and published in literature, thus adding to the search burden if all species

Art Unit: 1631

were examined together. Thus, the five species are independent and/or distinct invention types for restriction purposes.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
